EXPERIENCE

Akamai Technologies

August 2024 - Present

Software Development Engineer - DevOps / DB Services

Karnataka, IN

- Built a change data capture pipeline in Go with Debezium, Kafka, and NATS, streaming database changes reliably to downstream consumers.
- Developed a scalable Go messaging platform (mTLS over NATS) letting applications reach microservices running on Linode hosts.
- Hardened production access with RBAC-based read-only roles and drove Consul adoption for service discovery and secure service-to-service communication.
- Building Python automation for performance, chaos, and functional testing of Percona MySQL, ProxySQL, and PMM (Locust, k6, Chaos Mesh); findings led to upstream tickets against MySQL and Percona MySQL.
- Leveraging AI tooling (Copilot, OpenCode) to prototype quickly and Google Gemini to sanitize test reports before sharing.

Intel Corporation

August 2022 - July 2024

Infrastructure and DevOps - SDE II / Tech Lead

Karnataka, IN

- Architected test automation frameworks, saving \$1M by prioritizing critical bugs and enabling off-hours runs.
- Engineered scalable microservices with RESTful APIs across 1000+ systems, improving scalability and utilization.
- Standardized CI/CD with Jenkins shared libraries and agent templates, cutting new project setup time to 5 minutes.
- Delivered Python training to 1200+ employees, saving \$1.2M and promoting continuous learning.

Intel Corporation

August 2019 - August 2022

Software Engineer

Karnataka, IN

- Pioneered test content automation across 6+ domains for Windows Functional Validation: 1200+ test cases, 15% of the manual plan.
- Built CI/CD pipelines with standard DevOps tools: 20% faster deployments, 3x frequency across 4+ projects.
- Led technical ramp-up for a 30-member team with 40+ guides, halving onboarding time.

Intel Corporation

July 2018 - August 2019

Undergrade Intern Technical

Karnataka, IN

- Developed a Python-based automation framework for RF performance and compliance validation using Git, Intel XMM modems, CMW, and Anritsu testers.

EDUCATION

Bachelor of Technology, Computer Science

August 2015 - July 2019

Siliguri Institute of Technology, 9.12 DGPA

West Bengal, IN

SKILLS

Programming Languages	Experienced: Python Go	Familiar: Rust Bash C++ JavaScript
Software Development	Programming Paradigms Design Patterns Agile methodologies Git REST CLI CI/CD	
Frameworks & Libraries	FastAPI Flask Vue Pandas Selenium Playwright Poetry HUGO	
DevOps	Jenkins Kubernetes Docker Terraform SaltStack Argo Helm Consul	
Databases	Experienced: MongoDB Redis MySQL (Percona)	
Streaming & DB Tools	Kafka NATS Debezium ProxySQL PMM	
Languages	Native: Hindi	Fluent: English Beginner: Japanese Korean Mandarin

PROJECTS

kodekloud-downloader

April 2023

Download Manager for KodeKloud

[Source](#)

- Download manager for KodeKloud video lessons and quizzes.

Flappy NEAT

February 2018

NeuroEvolution Game

[Source](#)

- Flappy Bird using NeuroEvolution of Augmenting Topologies.

kisskh-dl

July 2022

CDrama/KDrama Downloader

[Source](#)

- CLI tool for downloading and decrypting shows from kisskh.co.

Myanimelist Data Set Creator

February 2018

Anime Data Parser

[Source](#)

- Parser and storage tool for myanimelist.net data.

OPEN SOURCE CONTRIBUTIONS

- Contributed to various open source projects: github.com/debakarr.
